

ADITYA SAMSHER SINGH

Mumbai, India | +91 9322558989 | adityasingh3499@gmail.com | linkedin.com/in/aditya-singh-89b884189 | github.com/Commanderadi | commanderportfolio.netlify.app

SUMMARY

Analytics and full-stack engineer with experience building internal data platforms, BI tools, and production web and mobile applications. Comfortable owning a feature end to end, from database schema and API design through deployment. Recent work includes PostgreSQL-based data pipelines, NestJS/React/Next.js services, a Flutter mobile app, and applied AI using hosted LLM APIs.

EXPERIENCE

Analytics Engineer (Data & Automation), ELETTRO

Mumbai, India | Full-time | Jan 2026 - Present

- Build internal data platforms and automation that replace Excel-based workflows with centralized reporting and dashboards.
- Delivered the Intelligence Portal (40+ REST endpoints) and FieldPulse (formerly FOAP), a field sales platform with about 173 REST endpoints and 26 database entities. FieldPulse was later spun out as fieldpulse.in.
- Built LLM-backed features on the Intelligence Portal using hosted model APIs, including structured outputs and retrieval-based search (RAG).
- Designed backend APIs with retry logic, idempotent handlers for async work, and structured logging for production reliability.
- Stack: PostgreSQL, Python, NestJS, React, Flutter, FastAPI, Redis, TypeScript, Docker, CI/CD.

Analyst & Applied AI Engineer, Key's Concept

Mumbai Metropolitan Region | Part-time | Jul 2025 - Dec 2025

- Analyzed financial and tax data across client portfolios, including tax filings, investments, and insurance, for 50+ clients.
- Automated reporting with Python and Excel, cutting manual effort by about 40% on recurring tax and portfolio-tracking tasks.
- Built internal dashboards for firm KPIs and client metrics, and explored generative AI for document processing and forecasting.

Data Science & Analytics Intern, Future Interns

Remote | Sep 2025 - Oct 2025

- Built Power BI dashboards with 15+ KPIs and integrated LLM APIs for automated reporting, cutting reporting time by about 60%.
- Built Python web scraping pipelines that reduced manual data collection by about 40%.

Data Science Intern, Unified Mentor Private Limited

Gurugram | Hybrid | Jul 2024 - Sep 2024

- Worked on data analysis, visualization, and early machine learning tasks using Python, R, SQL, and JavaScript.
- Collaborated with a mentor on data-driven prototypes and technical documentation.

AI / ML Intern, Amazon Web Services (AWS)

Remote | May 2023 - Jul 2023

- Worked with Python and TensorFlow on cloud-based ML labs, including ETL pipelines and model deployment patterns.
- Automated extraction of process-performance data across teams, improving reporting efficiency by about 30%.

Earlier roles: App Developer Intern at READYCODER (Java, Kotlin, Swift, Flutter). Cyber Security Intern at Palo Alto Networks (Wireshark, Nmap, Metasploit). Technical Coordinator, Entrepreneurship Cell, Galgotias University.

TECHNICAL SKILLS

- **Languages:** Python, TypeScript / JavaScript, SQL, Dart, Java, C++, HTML/CSS
- **Backend & APIs:** NestJS, FastAPI, Node.js, Express, REST, WebSockets (Socket.IO), TypeORM, SQLAlchemy Core, JWT, bcrypt
- **Frontend & Mobile:** React, Next.js, Flutter (Riverpod, Dio, go_router), Tailwind CSS, Radix UI, TanStack Query, Zustand, Recharts, Chart.js, Leaflet
- **Data & BI:** PostgreSQL (including Neon), MySQL, MongoDB, pandas, Power BI, DAX, ETL pipelines, web scraping, Excel automation
- **Machine Learning:** scikit-learn, XGBoost, TensorFlow, Transformers, spaCy, NLTK, CatBoost, SHAP, OpenCV
- **Generative AI:** Hosted LLM APIs, structured outputs, function/tool calling, retrieval-augmented generation (RAG)
- **Cloud & DevOps:** Docker, CI/CD (GitHub Actions), self-hosted infrastructure (Hetzner, nginx, Let's Encrypt), Cloudflare R2, Redis, Firebase, Sentry
- **Security & Production:** Multi-tenant / row-level security patterns, role-based access control, rate limiting, least-privilege access

PROJECTS

FieldPulse - Field Sales Force Automation | NestJS, React, Flutter, PostgreSQL, Redis, Socket.IO, TypeORM

Solo-built field sales automation platform for a manufacturing company: a NestJS/PostgreSQL backend (about 173 REST endpoints, 26 database entities), a Flutter mobile app with GPS-verified visit check-in and photo-verified odometer capture, and a React admin dashboard with a live fraud-detection map. Self-hosted on Hetzner with automated CI/CD. Later spun out as fieldpulse.in, a SaaS product for other distributors.

ELETTRO Intelligence Platform | Next.js, FastAPI, SQLAlchemy, PostgreSQL (Neon), Leaflet, Recharts

Solo-built, multi-tenant sales analytics platform for KN Elettro Industries (40+ REST endpoints, about 11,000 lines of code). Handles Excel/CSV data ingestion with automated geo-enrichment, RFM customer segmentation, an interactive map of India, product analytics, automated PDF reporting, and an AI chatbot for querying sales data.

Autonomous Research Agent | Python, spaCy, HuggingFace, Gradio, newspaper3k, APScheduler

AI research assistant that scrapes articles, cleans and processes the text with spaCy, and summarizes it with a Hugging Face T5 model in about 10-30 seconds per article. Includes scheduled automation with email/webhook notifications and a Gradio interface, deployed on Hugging Face Spaces.

EDUCATION

B.Tech, Computer Science, Galgotias University

CGPA: 7.6 | Noida, India | Jun 2021 - Jun 2025

CERTIFICATIONS

- Machine Learning Applications, Altair
- AI/ML Foundations, AWS Academy
- Data Science & Analytics Virtual Internship, Future Interns
- System Administration, Red Hat
- App Development Internship, Ready Coder
