SUMMARY

Analytics and full-stack engineer shipping internal data platforms, BI, and production web/mobile tools—PostgreSQL-first pipelines, NestJS/React/Next.js services, Flutter field apps, and applied ML & generative AI via hosted LLM APIs (structured outputs, retrieval, tool-style orchestration). Comfortable owning features from schema and API design through deployment (Redis, object storage, CI/CD) with production-minded reliability patterns.

EXPERIENCE

Analytics Engineer (Data & Automation) — ELETTRO

Mumbai, India · Full-time · Jan 2026 – Present

- Build internal data platforms, analytics frameworks, and automation that replace Excel-heavy workflows with centralized reporting and operational visibility.
- Deliver Intelligence Portal and FOAP ecosystem: internal portals and field tooling aligned with management and ops.
- Ship LLM-backed intelligence using vendor-neutral / multi-provider hosted model APIs—structured outputs, prompt/version hygiene, retrieval (RAG) and tool-style steps; pair model outputs with evaluation and human review for high-stakes signals.
- Stack: PostgreSQL, Python, NestJS, React, Flutter, FastAPI, Redis, object storage, TypeScript, Docker, CI/CD.

Analyst & Applied AI Engineer — Key's Concept

Mumbai Metropolitan Region · Part-time · Jul 2025 – Dec 2025

- Analyzed financial and tax-adjacent data (portfolios, ITR context, insurance) for 50+ clients; surfaced optimization and planning insights.
- Automated reporting with Python and Excel; cut manual effort ~40% on recurring ITR and portfolio-tracking tasks.
- Built internal analytics dashboards for firm KPIs, retention, and service delivery; explored GenAI for documents, segmentation, and forecasting.

Data Science & Analytics Intern — Future Interns

Remote · Sep 2025 – Oct 2025

- Power BI dashboards with 15+ KPIs; integrated hosted LLM / generative APIs for automated reporting (~60% faster reporting cycle).
- Python web scraping pipelines feeding dashboards; ~40% reduction in manual data collection.

Machine Learning Intern — Suvidha Foundation (Suvidha Mahila Mandal)

Mumbai · Remote · Aug 2025 – Sep 2025

- Applied ML workflows: data prep, experimentation, and evaluation supporting foundation programs; multimodal prompting and model iteration.

Data Science Intern — Unified Mentor Private Limited

Gurugram · Hybrid · Jul 2024 – Sep 2024

- Data science tasks in Python, R, SQL, JavaScript: analysis, visualization, starter ML flows; mentor-led delivery and documentation.

AI / ML Intern — Amazon Web Services (AWS)

Remote · May 2023 – Jul 2023

- Python and TensorFlow with major-cloud ML labs; ETL-style pipelines, model deployment patterns, and REST integration for ML services.

- Automated extraction of process-performance data across teams; improved reporting efficiency ~30%.

Earlier roles: READYCODER — App Developer Intern (Java, Kotlin, Swift, Flutter). Palo Alto Networks — Cyber Security Intern (Wireshark, Nmap, Metasploit). Entrepreneurship Cell, Galgotias University — Technical Coordinator.

TECHNICAL SKILLS

- **Languages:** Python, TypeScript/JavaScript, SQL, Java, C++, HTML/CSS
- **Data & BI:** PostgreSQL, MySQL, MongoDB, pandas, Power BI, DAX, ETL pipelines, web scraping, Excel automation
- **Backend & APIs:** NestJS, FastAPI, Node.js, Express, REST, WebSockets (Socket.IO)
- **Frontend & mobile:** React, Next.js, Flutter, Tailwind, Chart.js
- **ML/DL/NLP:** scikit-learn, XGBoost, TensorFlow, transformers, LLM orchestration, spaCy, NLTK, CatBoost, SHAP, OpenCV
- **Generative AI:** hosted LLM APIs, structured outputs, function/tool calling, streaming, multi-provider integrations, RAG
- **Cloud & DevOps:** Docker, CI/CD, object storage, infrastructure-as-code (familiarity), static/app hosting
- **Production & security:** Multi-tenant/RLS patterns, Redis caching, JWT/session auth, least-privilege access, observability, rate limiting

SELECTED PROJECTS

FOAP — Field Officer Platform — *NestJS, React, Flutter, PostgreSQL, Redis, Socket.IO*

3-tier SaaS for field sales ops: real-time GPS tracking, offline-first mobile with odometer photo OCR, visit & quotation management, live admin map. Web dashboard live; Android app in closed testing on Google Play.

ELETTRO Intelligence — *Next.js, FastAPI, Supabase, PostgreSQL, Leaflet*

Sales intelligence platform for an Indian manufacturer: GST-aware analytics, customer segmentation, churn prediction, AI chatbot, PDF reports. 26K+ real sales records, Rs. 29.65 Cr revenue tracked.

Autonomous Research Agent — *Python, spaCy, HuggingFace, Gradio*

RAG-style research assistant: scrape → NER (spaCy) → T5 summarization → Gradio UI; 500+ articles/week scale in internal testing.

Churn Prediction — *Python, scikit-learn, XGBoost, Flask*

End-to-end ML pipeline (7K+ records); ensemble models (89% accuracy, 0.85 F1); Flask API with preprocessing for retention use cases.

E-commerce Sales Forecasting — *Python, Prophet, LSTM, TensorFlow, Flask*

Time series on 50K+ transactions; compared Prophet, ARIMA, LSTM (~92% accuracy, 8.3% MAPE); Flask API for 30-day horizon forecasts.

EDUCATION

Galgotias University — B.Tech, Computer Science · CGPA: 7.6

Noida, India · June 2021 – June 2025

CERTIFICATIONS

- Machine Learning Applications — Altair
- AI/ML Foundations — AWS Academy
- Data Science & Analytics Virtual Internship — Future Interns
- System Administration — Red Hat
- App Development Internship — Ready Coder
